INTERNATIONAL BACHELOR'S DEGREE PROGRAMMES DENMARK

VIA University College is one of the largest institutions of higher education in Denmark

We offer accredited professional bachelor's degree programmes in English in engineering, design, and construction. Join a vibrant international student community, develop your skills, and get great career opportunities.

Our programmes

The Danish educational system is ranked as one of the best in the world. At VIA, our study programmes rely on innovative teaching methods using elements of sustainability, entrepreneurship, and problem-based learning. We connect theoretical teaching with professional practice and include mandatory internship periods for all students.

Our English degree programmes include:

- Architectural Technology and Construction Management
- Branding and Marketing Management
- Climate and Supply Engineering
- Fashion Design
- Software Technology Engineering

Why Denmark

Denmark is one of the safest and least corrupt countries to live in. The Danish society is built on trust, community, and a well-functioning welfare system that includes free healthcare. These are a few of the reasons why Danes are considered some of the happiest people in the world.

Student costs

Students from EU/EEA countries are not required to pay tuition fee in Denmark. Living costs vary depending on your choices but expect costs at around 850 EUR pr. month. It is also possible to take on a student job, but it can take a while to find one, so remember to bring enough funds for the first months.

Employability

Denmark offers internationals unique career opportunities, and it is indeed a popular place to work and live with job satisfaction rating amongst the highest in Europe. Therefore, VIA offers all students free career support with a variety of events and guidance for CVs, job applications, interview preparation and navigating the Danish job market.

Upon graduation, you will obtain a professional bachelor's degree corresponding to 3.5 years of studies/210 ECTS. With a full set of professional skills, this enables you to take on a job straight after graduation, while also granting access to further studies at master's degree level.

More information
