

International Profile

INTERNATIONAL PROFILE

VIA University College is a frontrunner for internationalisation in Denmark

We work strategically with entrepreneurship, digitalisation, as well as sustainability including UN's Sustainable Development Goals. One of our main ambitions is to incorporate an international element in all our study programmes for the benefit of our students, staff as well as international students coming to VIA to study.

A global outlook

Internationalisation is in our DNA, and global partnerships are vital in ensuring international opportunities and skills for our students in preparation for a globalised job market. There, we engage internationally:

- by sending our students and staff out into the world
- by receiving international students at our campuses
- by offering international elements in our study programmes
- by doing research collaborations with partner institutions from all over the world
- by exporting knowledge and education to other countries

Our international portfolio

VIA offers bachelor's degrees in Danish and English, vocational training as well as continuing education with the student at the centre of everything we do.

We are proud to offer a wide range of international activities at home and abroad, including:

- Summer schools
- Student and staff mobility
- Research and development
- Bachelor's degrees, top-up, and diploma programmes

Contact us

Reach out to our Global Engagement department on e-mail international@via.dk to learn more or visit our website en.via.dk for more information.

VIA is a wonderful partner university to work with. Their programmes are excellent, and our students and lecturers are in very good hands when studying and working at VIA. We share similar values, and both have put internationalisation as well as innovation of education on top of our agendas
