## VIA SUMMER SCHOOL

---

# Exploring Denmark while gaining extra credits in an international environment

Our summer school offers a variety of courses in innovation and communication in various fields. We have a special emphasis on sustainability and entrepreneurship and welcome Danish and international students.

### What is VIA Summer School

VIA University College's summer school programme offers three to four weeks intensive courses at a bachelor's level taught fully in English. The courses are 5-10 ECTS in credits and take place during August primarily at our beautiful campus in the centre of Aarhus.

VIA Summer School provides students with courses in health, sustainability, business, social science, animation, engineering, and construction alongside a social programme. All courses offer hands-on experience and are based on an applied science approach.

Course examples from 2023:

- 2d TV-Animation
- Crowdsourcing and strategic innovation communication on digital platforms
- Deep Dive into Entrepreneurship
- International Health: Welfare Technology and Dementia
- Multi-storey Timber Construction - Low Carbon Building Design
- Sustainable Intrapreneurship
- United Nations' 17 Sustainable Development Goals and Co-Creation

We welcome Danish and international full-time students, students from our partner institutions and any other interested and qualified students both from Denmark and abroad.

### Contact us

Reach out to our VIA Summer School team on e-mail [summerschool@via.dk](mailto:summerschool@via.dk) to learn more or visit our website [en.via.dk](http://en.via.dk) for more information.

I have heard before that Denmark focuses on practical learning and it was really evident throughout the summer course. The best part of the summer school was definitely meeting all the people. I was lucky to have such a diverse group of people on the course with various backgrounds and interests.

Anete Strupule, VIA Summer School participant from the UK
