

VIA University College – August 2016

Bachelor of Architectural Technology and Construction Management

AP degree in Building Technology programme.

Laptop computer

All students are required to bring their own laptop computer.

The computer should be able to handle 3D drawings in Autodesk Revit (latest version, currently 2017). This requires a powerful computer.

For information on recommended computer profiles see:
<http://usa.autodesk.com/revit/system-requirements/>. Recommended “Balanced performance” profile on the website.

You will also need a wheel mouse and a memory stick for file backup.

Apple Mac computers are not recommended if you are in process of buying new pc. Yet possible to use Apple Mac computer if it can run dual operating system.

Other programs used during the studies are Microsoft office, Microsoft Internet Explorer, Microsoft Project, Mind View and SketchUp. These programmes are free for VIA students

A student version (for personal use) of Autodesk Revit can be downloaded from Autodesk’s homepage for free. Student versions of SketchUp are available for free through the College.

Depending on the selected configuration and supplier, the total cost for computer and software is estimated to be between 10.000 and 20.000 DKK (1200 and 2500 EUR).

These specifications are our current recommendations and accurate as of the date it was published. Advancements in technology may supersede what is specified and the university college may change these recommendations in the future.
